out of the death of the ch'ld at White Plains. Eddy, leader of the cult, has port all such cases as come under their

This is a pronounced recession from a principle that Scientists have held that of prayer. They have maintained and Mrs. Eddy has maintained that there is no such thing as disease. Now the venerable founder of the cult admits the lowers to refrain from meddling with it contagious or infectious form.

This will restrict the "healers" to the How they will take it remains to but their adherence to the doc trines laid down by "Mother" Eddy has always been so firm that it is doubtful If there will be any protest, even of the successful "healers."

in an editorial in the current number the Christian Science Sentinel, the firtal organ of the Scientists, Mrs. Eddy writes as follows:

'Until the public thought become belier acquainted with Christian Science the Christian Scientists shall decline to dector infectious or contagious dis-

"On the subject of reporting contagion I have this to say: I have always believed that Christian Scientists should be law-abiding; and, actuated by this conviction. I authorized the following statement about one year ago:

Rather than quarrel over vaccination I recommended that if the law demand an individual to submit to this process, he obey the law, and then appeal to the sults. Whatever changes belong to this century, or any epoch, we may safely submit to the providence of God, to common justice, individual rights and governmental usages.

"This statement should be so interpreted as to apply, on the basis of Christian Science, to the reporting of contagion to the proper authorities when the law so requires."

Vhen Jesus was questioned about obeying the human law, as declared: Render unto Caesar things that are Caesar's,' even while you 'render unto God the things that are God's." In the same strain the editor con-

"Healing through Christian Science has been before the public for some and True, winning in a drive, covered thirty-six years, and notwithstanding the six furiongs in 1:13 3-5. The prethat it has been the subject of bitter eriticism and merciless attack, it has won its way to public confidence through

who its way to public confidence through the healing of every form of discase.

"Its adherents are healthy, happy men and women, and in unnumbered cases they were made healthy and hatropy, through Christian Jsience after years of suffering, and after medical and surgical treatment had utterly start poor. Won easily. Time—1.21 2-5. surgical treatment had utterly failed. If there were but one such case Pigeon Post beat the gate, but he only it would present justification for the had his advantage to the turn, where existence of the Church of Christ, Scien- Tugal Bey went to the front and showed tist, but there are thousands. To demand of Christian Scientists unvarying success in overcoming disease, is to subject them to a test which would utterly and forever condemn the material methods of treatment for which the

methods of treatment for which the exactors stand.

"Undoubtedly the list of thirty-five failures within six years, recently complete, but if there were several times that number the percentage would still be so far below the normal death rate under medical practice as to accentuate the fact that Christian Science is more efficient.

"We have heard no whisper of indicting the physicians and parents of the ing the physicians and parents of the ing

"Mrs. Eddy is constantly in receipt of thanks and encouraging words from tarchishops, doctors of divinity, eminent lawyers and loving children.

"The prosperity of our cause and the health and regeneration of mankind demand that all Christian Scientists shall be awake to every thought that quickens their spiritual perception. They must remember that in science, divine love alone governs man (Church Manual), and steadfastly equiscrate themselves to the service of Ged."

Roland B. Molineux left his home about 11 o'clock to-day, wearing a Fesaid:

"We have much evidence to give and a bout seventy-five witnesses to be heard, but I cannot estimate the time it will take. Much depends upon how the Commission receives the evidence, whether there is much cross-questioning of witnesses and discussions on the points presented, so you see it is impossible to judge."

Some of Mr. Mitchell's assistants say that not less than three weeks will be needed. All the sessions are to be held in Sgranton, according to present plans. There the Commissioners and President Mitchell will have their office forces and be settled for a long stay. President Mitchell desires that the session be completed there, as time will be saved and his witnesses can appear from different parts of the region.

The evidence arranged by the mineworkers is now almost complete. The force worked until midnight last night and started again early this morning. This afternoon all will go to Scranton. The Commissioners and the coal company officials and attorneys are now gathering there

THE PENNSYLVANIA RAILROAD. RAISES WAGES.

Army of 59,000 Men Will Be Given a Voluntary Advance of \$4,250,000—This is the Second Surprise of the Kind for the Employees This Year.

Decision Reached at a Meeting of the Directors in Philadelphia Yesterday but Kept Secret Till Announced by President A. J. Cassatt, Who Intended It as a Surprise.

(Special to The Evening World.)

PHILADELPHIA, Nov. 13 .- From point to point over the telegraph ines of the Pennsylvania Railroad to-day was flashed the joyful news that 59.000 employees would receive an increase of 10 per cent. in their salary dating from the first of the present month. The word was sent out from President Cassatt's office, and in a remarkable short space of time every division superintendent had been notified. This increase affects the employees east of Pittsburg and Erie only.

As soon as the superintendents received the news it was transferred to heads of departments, who quickly posted notices acquainting their subordinates of the fact, and general rejoicing followed

DECISION REACHED YESTERDAY.

before the action should be made public. It therefore followed that the first inkling of the road's generosity came from the men themselves. The officialnotification states that all employees who receive a salary of \$200 per month or less will be the recipient of 10 per cent, increase to date from

It is estimated that the Pennsylvania Railroad has in its employ east of Pittsburg and Erie at the present time 60,000 men, and at least 98 per cent. of these are affected by the increase. Under normal circumstances only 45,000 would be employed, but the tremendous increase in foreign

traffic has necessitated the employment of at least 15,000 more

Estimating that the average rate of wages paid per month is \$60 per manand this is a mild estimate—the additional pay-roll charge per month would

In the various offices of the Pennsylvania Railroad at Broad street sta

(Special to The Evening World.)
RACE TRACK. BENNINGS, Md., Nov. 12.—The weather here this afternoon was so warm that the man who more even a top coat was stared at curiously. The brilliant afternoon was responsible for the lorsest attendance of the meeting thus far, and speculation picked up quite a bit.

There was nothing particularly interness and the first indicated a bench warrant for the man's arrest. The bondsman is John Iden, of No. 100 East Fourth street.

When I heard or the photocasts with the Allesert's ball with the proposed retirement. Heard on the proposed retirement of the directors had intended to do had leaked out, and even after the action went to a high police official who was lot a strength of the proposed retirement of the directors had intended to do had leaked out, and even after the action street. Human have been opened and inspected. Human have been opened

annually. Evidently the policy paid, for with the tremendous increase in the number of employees that is to result from the construction of the new North River tunnel and the establishment of the New York and Long Island terminals the pay-roll will be increased a sum beyond the total wage expense of many smaller lines.

In addition to the policy of increasing wages the Pennsylvania system inaugurated some time ago a system of pensions for superannuated or disabled employees that is said to be the most liberal in the country. Nearly every railroad of prominence has a Relief Fund, the bulk of which is contributed by the employees, although the companies manage it without compensation and donate sufficient amounts to keep the treasury funds up

BULK OF EXPENSE BORNE BY COMPANY.

The Pennsylvania Fund, while resembling the plan of other railroads in some respects, is more radical in that the bulk of the expense falls upon The boiler explosion came without warning and there was the company, and that in addition to supplying sick and death benefits it takes care of employees compelled to retire because of long service or dis-

> Ten years of labor were spent before the plan was perfected. There were many difficulties to be overcome. Finally it was decided that the

Employees of the Pennsylvania are now compelled to retire when they each the age of seventy years. Between the ages of sixty-five and sixty-nine Nine puddle furnaces were wrecked, and it is feared that years they may be retired upon proof of physical disability. The pension plan incorporates the payment of an amount equal to 1 per cent. of the annual wages for each year of service. For instance a man whose average wages while in the employ of the company were \$800 a year and who had worked for thirty years, would receive 30 per cent. of his salary or \$240 annually after retirement and until death. There are now about 1.600 retired employees on the pension rolls, to whom are paid more than \$300,000

No man is taken on as an employee of the Pennsylvania who is over thirty-five years of age, unless exceptional circumstances should prevail, or unless he had been employed at some previous time and had terminated his connection with the company amicably. A Board of Officers consisting of the Vice-Presidents, the General Manager and Assistant Comptroller of the road manages the pension fund.
